ABOUT NO WRONG NUMBERS

Drawing inspiration from 90's Alternative Funk Rock, videogames, and the aesthetics from that era, Manolo (No Wrong Numbers) tries to express his emotions and thoughts in quirky and energetic musical creations.

Facing challenges in transitioning from the pretty but small city of Xalapa, Veracruz, to the crazy and big city of Los Angeles, California, No Wrong Numbers is navigating the obstacles and opportunities the city presents and at the same time working on what is going to be the second album. The 2022 single, 'You Stop My Heart,' produced by the Argentinian producer Camilo Froideval, marked a significant evolution in their compositions, capturing a more 'landed' sound for the project. No Wrong Numbers earned the opportunity to collaborate with him by winning the #1 position in the 2018 "Vans Sessions" contest, triumphing over 1000 bands from across Mexico. Judges, including the American guitarist and songwriter Theresa Wayman (Warpaint), recognized the band's talent and potential. Their accomplishments have opened doors to prestigious events and festivals, such as House of Vans and Vive Latino in 2020. As they continue their musical journey, No Wrong Numbers is actively experimenting with new sounds and seeking to build a fresh audience..
